Revised 09/23/25

Public Water Supply Watershed/Aquifer
Project Notification Form
For The
South Central Connecticut Regional Water Authority

REQUIREMENT:

All applicants before a municipal Planning and Zoning Commission, Inland Wetlands Commission, or Zoning Board of Appeals for any project located within a public water supply watershed or aquifer protection area are required by Public Act 89-301 (Sections 8-3i and 22a-42f of the Connecticut General Statutes) to notify the affected public water utility by certified mail within 7 days of the application.

GENERAL INFORMATION:

Maps showing the location of Regional Water Authority (RWA) watershed boundaries are on file with municipal planning and zoning, and inland wetlands staff, and Town Clerks. The applicant's notification to the RWA should include the information requested on pages two and three. The RWA may request additional information if it is determined that a more detailed review is necessary. Any questions should be directed to (203) 401-2786, or emoore@rwater.com.

Please email this completed form and attachments to:

State of Connecticut Stormwater Permit Requirements

DEEP Stormwater Permit Requirements for Developers and Contractors

As stated in the Town of North Branford Stormwater Management Plan, during the plan review and approval process, developers and contractors shall be notified of their potential obligation to obtain authorization under the Connecticut Department of Energy and Environmental Protection (DEEP) General Permit for Discharge of Stormwater and Dewatering Wastewaters Associated with Construction Activities (Construction General Permit). If your project disturbs more than one acre of land, regardless of phasing, and results in a point source discharge to Connecticut surface waters directly or through the Town's Municipal Separate Storm Sewer System (MS4), you are responsible to meet the requirements of the DEEP Construction Stormwater General Permit as follows:

- If your project disturbs between one and five (5) acres, you must adhere to the erosion and sediment control land use regulations of the Town of North Branford as defined in the Zoning Regulations and Inland Wetland and Watercourse Regulations, and the Connecticut Guidelines for Soil Erosion and Sediment Control and Connecticut Stormwater Quality Manual. No registration, plan review or certification is required from DEEP for such construction activity provided that a Town land-use commission such as the Planning and Zoning Commission and/or Inland Wetlands and Watercourse Commission, reviews and issues a written approval of the proposed erosion and sediment control measures, pursuant to the requirements of Section 22a-329 of the Connecticut General Statutes.
- If your project disturbs greater than five (5) acres of land, you are required to submit a registration for the Connecticut General Permit a minimum of sixty (60) days prior to the planned commencement of the construction activity.

All construction operations must be conducted in accordance with all federal and state permit requirements concerning water, air, noise, pollution, and the disposal of contaminated or hazardous materials. A copy of the Stormwater Pollution Control Plan for the project shall be provided to the Town upon request.

Additional information can be obtained by calling the DEEP at 860-424-3000 or visiting their Construction Stormwater General Permit webpage at:

http://www.ct.gov/deep/cwp/view.asp?a=2721&q=558612&DEEPNav_GID=1654
